

Please delete the fourth paragraph on page 4, which begins "A polynucleotide encoding a polypeptide of the present invention . . ." and ends " . . .has conserved cysteine residues in common with cripto growth factor," and replace it with:

C2
--A polynucleotide encoding a polypeptide of the present invention was discovered in a cDNA library derived from human pancreatic cancer tissue. It is structurally related to the human cripto growth factor. It contains an open reading frame encoding a protein of 223 amino acid residues of which approximately the first 23 amino acids residues are the putative leader sequence such that the mature protein comprises 200 amino acids. As shown in figure 2 the polypeptide of the present invention has conserved cysteine residues in common with cripto growth factor.--
